

# DURASEAL

## PRODUCT DATA

**DESCRIPTION:** DURASEAL is a specially developed unmodified 100% water based Polyurethane seal for wood and cork flooring that will provide a clear, flexible, abrasion and chemical resistant finish which is easily maintained.

### **PROPERTIES:**

- Fast curing
- Clear flexible finish
- Excellent abrasion resistance
- Easily maintained
- High chemical resistance
- Quick drying time
- Very low odour

**USES:** DURASEAL has been developed for use on new or re-sanded hardwood, softwood or cork floors. It is suitable for use in both commercial and domestic areas and for re-coating pre-finished floors.

**APPLICATION:** Ensure that the surface to be treated is thoroughly cleaned of all oil, grease and any previous treatment, preferably sanding back to the original wood surface, and finishing with as fine abrasive as possible. Apply the first coat of DURASEAL using a pad or lambswool roller and allow to dry thoroughly. Raising may occur on some types of wood grain and it will be necessary to buff back, in which case the first coat should be left for 3-4 hours. The second and third coats should be applied as soon as possible after the previous coat has fully dried. Allow the finish to harden overnight before use.

**MAINTENANCE:** The sealed floor should be routinely vacuumed or swept with a soft brush. Dirt should be removed with a clean, slightly damp mop using a neutral floor cleaner such as Floortech Neutral Floorclean. Emulsion polishes can be used for non-sport areas but must not be applied until the seal has fully cured.

**COVERAGE:** Approximately 12 – 15 m<sup>2</sup> per litre depending on the surface absorption.  
i.e. 5 litre = 3 coats on approx. 20m<sup>2</sup>

**HEALTH AND SAFETY:** Over exposure may be irritating to the eyes, skin and respiratory system. Splashes to the eyes should be flushed with copious quantities of cold water. Splashes to the skin should be washed immediately with warm soapy water. Spillages should be absorbed with non-combustible material such as sand or earth and disposed of in accordance with local regulations. Do not allow to enter drains. In case of fire or explosion, do not breath fumes. **KEEP OUT OF REACH OF CHILDREN.**
